

**APPLICATION FOR A PRE-APPROVED LIMIT
GASOLINE BULK STORAGE FACILITY - 18 AAC 50.230(d)**

FACILITY IDENTIFICATION

Facility Name:

Facility Address:

City, State, Zip:

Longitude/Latitude or UTM Coordinates:

Facility Contact:

Phone Number:

I, _____, being the duly authorized representative for _____, formally submit the request under 18 AAC 50.230(a), (b), and (d) for a pre-approved limit of 19,900 gallons per day maximum throughput or transfer (e.g. receiving and dispensing) of gasoline at the bulk storage facility cited above.

Please list all of the tanks containing gasoline at the facility, including working capacity for each tank*:

GASOLINE STORAGE TANKS:

	<u>Source ID</u>	<u>Tank Manufacturer or Model</u>	<u>Working Capacity (gallons)</u>

* (Use additional pages or attachments as necessary)

The facility estimates that the sources listed above will transfer or move an average of _____ gallons per day during any consecutive day of operation.

In order to qualify for this pre-approved limit request under 18 AAC 50.230(a), (b), and (d), we agree to the following conditions listed in 18 AAC 50.230(d)(2)(A) - (D):

- (1) limit the quantity of gasoline transferred from tanks at the facility each day to less than 19,000 gallons;
- (2) record the amount of gasoline transferred from tanks at the facility each day;

- (3) keep all receipts for fuel sales and all records under 18 AAC 50.230(d)(2)(B) available for Department inspection for at least five years;
- (4) no later than January 31 of each year, submit to the Department a copy of the records and calculations required by 18 AAC 50.230(d)(2)(B) for the preceding year.

By signing this application form, I formally acknowledge that I have read the requirements of 18 AAC 50.230(a) - (c), and (d). Under 18 AAC 50.230(d)(1)(D)(i) and as certified by my signature below, that "Based on information and belief formed after reasonable inquiry, I certify that the information in this request is true, accurate, and complete", and that under 18 AAC 50.230(d)(1)(D)(ii), that "the owner or operator fully understands the conditions required under 18 AAC 50.230(d)(2)(A)-(D) and agrees to those conditions in order to be classified as a bulk gasoline plant."

18 AAC 50.230. PREAPPROVED LIMITS. (a) This section sets out limits for certain sources that become effective the day after the department receives a request containing all the required information. Under these "preapproved" limits, no additional department approval is required. The department will notify a person requesting a limit under this section, in writing, of the date the limit took effect. The owner and operator shall comply with the limit while it is in effect. The limit remains in effect until revoked in accordance with (e) of this section.

(b) The owner or operator of a facility containing one or more sources described in (c) or (d) of this section may request that the preapproved limits in those subsections be applied to that facility. To make the request, the owner or operator shall submit to the department the information required for the limit requested.

(c) Limits on the allowable emissions of, or potential to emit, nitrogen oxides from diesel engines may be established by restricting the amount of fuel that may be burned in an engine. To implement these limits, the owner or operator shall

(1) submit to the department a letter or form containing

(A) the name and address of the facility to which the limits will apply;

(B) a list of all diesel engines at the facility to which the limits will apply, including the model and rated capacity of each diesel engine;

(C) the maximum quantity of fuel, in gallons, that the owner or operator will be limited to use in the equipment listed in (B) of this paragraph in any consecutive 12 months;

(D) a calculation of the nitrogen oxides, in tons per year, that the equipment listed in (B) of this paragraph would emit if subjected to the limits on fuel use proposed under (C) of this paragraph, based on an emission factor of one ton of nitrogen oxides for every 3,309 gallons of fuel used;

(E) an estimate of the potential to emit nitrogen oxides, in tons per year, from all sources at the facility that are not listed under (B) of this paragraph;

(F) a calculation of the total maximum emissions of nitrogen oxides, in tons per year, from the facility determined by adding the values derived under (D) and (E) of this paragraph;

(G) a list setting out each of the conditions required under (2) of this subsection; and

(H) a certification bearing the owner's or operator's notarized signature stating that

(i) "Based on information and belief formed after reasonable inquiry, I certify that the information in this request is true, accurate, and complete"; and

(ii) the owner or operator fully understands the conditions required under (2) of this subsection and agrees to those conditions in order to limit nitrogen oxide emissions from the equipment listed under (B) of this paragraph to no more than the value calculated under (D) of this paragraph; and

(2) agree to

(A) limit the quantity of fuel burned in the equipment listed under (1)(B) of this subsection during any consecutive 12 months to no more than the amount proposed under (1)(C) of this subsection;

(B) record the amount of fuel consumed in the equipment listed under (1)(B) of this subsection each month and calculate the total fuel consumed in the equipment during the preceding 12 months;

(C) keep all receipts for fuel purchases and all records and calculations under (B) of this paragraph available for department inspection for at least five years; and

(D) no later than January 31 of each year, submit to the department a copy of the records and calculations required by (B) of this paragraph for the preceding year.

(d) The owner or operator of a gasoline distribution facility may limit the facility's maximum daily throughput of gasoline to less than 19,900 gallons and, thereby, become a bulk gasoline plant under the standards adopted in 18 AAC 50.040(a)(2)(M) and (AA). The owner or operator shall

(1) submit to the department a letter or form containing

(A) the name and address of the facility to which the limit will apply;

(B) a list of all tanks containing gasoline at the facility, including the working capacity of each tank;

(C) a list setting out each of the conditions required under (2) of this subsection; and

(D) a certification bearing the notarized signature of the owner or operator stating that

(i) "Based on information and belief formed after reasonable inquiry, I certify that the information in this request is true, accurate, and complete"; and

(ii) the owner or operator fully understands the conditions required under (2) of this section and agrees to those conditions in order to be classified as a bulk gasoline plant; and

(2) agree to

(A) limit the quantity of gasoline transferred from tanks at the facility each day to less than 19,900 gallons;

(B) record the amount of gasoline transferred from tanks at the facility each day;

(C) keep all receipts for fuel sales and all records under (B) of this paragraph available for department inspection for at least five years; and

(D) no later than January 31 of each year, submit to the department a copy of the records required by (B) of this paragraph for the preceding year.

(e) The owner or operator may terminate a limit under this section by notifying the department, in writing, of the proposed date for termination of the limit. On and after the proposed date, the limit is no longer in effect unless the limit made it possible for the owner or operator to avoid any preconstruction review procedures. If the limit made it possible for the owner or operator to avoid any preconstruction review under this chapter, the limit remains in effect until the owner or operator

(1) obtains a new construction permit under this chapter as if the limit had never existed; or

(2) obtains a new limit under this section or under 18 AAC 50.225 that allows the owner or operator to continue to avoid preconstruction review. (Eff. 1/18/97, Register 141)
